BUSINESS VALUE BLUEPRINT

Your recommended starting point

A practical summary of your ROALLA assessment and an initial 90-day direction.

Prepared October 15, 2026

READINESS SNAPSHOT
80%

SUGGESTED PATH
ROALLA Agentic

RECOMMENDED ACTION
Agentic — deploy governed AI agents

READINESS CONSIDERATION
Strategy & Roadmaps
Also consider: Operations & Process Improvement

LOW-RISK STARTING POINT
Agentic Readiness Sprint
Scope one governed agent, its approved actions, connected systems, and human checkpoints.
Typical timeline: 1 to 2 weeks

Key recommendations

- ✓ Define the outcome, approved actions, decision boundaries, and accountable owner
- ✓ Map every system, permission, data source, and human checkpoint the agent needs
- ✓ Start with a narrow workflow and test normal, exceptional, and failure conditions
- ✓ Instrument approvals, logs, monitoring, escalation, and safe shutdown from the start

Next steps

1. Explore ROALLA Agentic for governed agents and multi-agent workflows
2. Submit an inquiry with the workflow, systems, users, and risk constraints
3. Discuss whether an agentic pilot is safe, useful, and ready to measure

30, 60, and 90-day direction

FIRST 30 DAYS
Confirm the current state, intended outcome, decision owner, and most important risk.

BY 60 DAYS
Complete the smallest useful sprint or pilot with clear owners and measures.

BY 90 DAYS
Review the evidence, document the learning, and decide whether to continue, adjust, or stop.

This document provides initial direction based on your responses. Scope, timing, and pricing are confirmed after a fit review. Results are not guaranteed.
