ROALLA

EXECUTIVE MARKETING AND REVENUE GUIDE

# Marketing to Revenue Alignment Guide 2026

## A decision framework for connecting market strategy, demand creation, pipeline and revenue outcomes

Prepared for Canadian boards, founders, chief executives, marketing, sales, product, customer success, finance, technology and operations leaders

Prepared by ROALLA Transformation and Technology Advisory

Status date: 6 October 2026

### Purpose

This guide helps leadership align marketing, sales, product, customer success and finance around target markets, customer journeys, demand, acceptance, attribution and revenue outcomes. It replaces disconnected activity measures with a governed system for customer progression, commercial learning and investment decisions.

EXECUTIVE DECISION DASHBOARD

# Management View at a Glance

Marketing contribution should be managed through customer progression and commercial outcomes, not isolated activity. Leadership should insist on shared definitions, explicit acceptance criteria, reliable feedback and evidence-based investment shifts while preserving trust, consent and brand integrity.

| Executive question | ROALLA view | Decision implication |
|---|---|---|
| **Is market focus shared?** | **CONDITIONAL** | Confirm priority segments, buying situations, outcomes and exclusions across functions. |
| **Do handoffs preserve customer context?** | **PREPARE** | Define acceptance evidence, response timing, ownership, rejection reasons and feedback. |
| **Can revenue influence be explained?** | **CONDITIONAL** | Use progression, cohort and source evidence without claiming false precision. |
| **Are data and outreach trustworthy?** | **DECIDE** | Validate consent, source, access, quality, claims, retention and channel practices. |
| **What should management authorize?** | **PURSUE** | A 90-day marketing-to-revenue operating model and measurement reset. |

## Recommended Management Posture

Proceed through a small number of explicit decision gates. Preserve evidence as work occurs, separate discovery from implementation, and require each investment to demonstrate value, feasibility, control effectiveness and accountable ownership before scale.

EXECUTIVE DECISION MODEL

# The Eight Marketing to Revenue Alignment Gates

Alignment exists when market strategy, customer experience, demand programs and revenue execution use shared evidence. The gates focus leaders on the decisions and operating interfaces that convert investment into learning, pipeline and durable customer value.

| Stage | Gate | Required conclusion | Decision evidence |
|---|---|---|---|
| **01** | Market focus | Priority segments and buying situations are explicit | Need, access, urgency, economics and strategic fit |
| **02** | Customer journey | Progression reflects customer decisions | Roles, questions, evidence, barriers and channels |
| **03** | Message and offer | Claims connect differentiated value to need | Outcomes, proof, relevance, accessibility and trust |
| **04** | Demand portfolio | Programs balance capture and creation | Channels, accounts, content, partners, experiments and cost |
| **05** | Handoff | Acceptance and follow-through are governed | Definitions, evidence, timing, ownership and feedback |
| **06** | Measurement | Performance connects to commercial outcomes | Progression, pipeline, revenue, economics and confidence |
| **07** | Technology and data | Systems support one customer view | Consent, source, identity, integration, quality and access |
| **08** | Governance | Investment changes through evidence | Cadence, decisions, owners, experiments and reallocation |

## Decision Rule

A failed hard gate moves the initiative to Prepare or Monitor. A strong narrative, senior sponsor or attractive market cannot replace missing authority, evidence, delivery capacity or operating control.

SECTION 01

# Readiness Framework

## Translate ambition into a shared executive view of value, evidence, capability and risk.

MANAGEMENT ASSESSMENT MODEL

# Readiness Dimensions

| No. | Decision area | Management evidence | Status |
|---|---|---|---|
| **01** | Strategy and segments | Market priorities, ideal customers, buying situations and investment choices | **Confirmed / Developing / Gap** |
| **02** | Customer and message | Journey, roles, questions, content, proof, accessibility and trust | **Confirmed / Developing / Gap** |
| **03** | Demand and channels | Capture, creation, accounts, partners, events, digital and experiments | **Confirmed / Developing / Gap** |
| **04** | Funnel and handoffs | Progression, acceptance, response, qualification, feedback and ownership | **Confirmed / Developing / Gap** |
| **05** | Data and attribution | Consent, identity, source, quality, influence, pipeline and economics | **Confirmed / Developing / Gap** |
| **06** | Governance and learning | Cadence, decisions, budget shifts, experiments and accountability | **Confirmed / Developing / Gap** |

## Evidence Standard

Assessments should distinguish verified evidence from management confidence. Where evidence is incomplete, record the gap, owner, completion date and decision that depends on it.

STRATEGIC READINESS DEPENDENCIES

# What Readiness Depends On

| Dependency | Why it matters | Evidence management should expect |
|---|---|---|
| **Market focus** | Priority segments and buying situations are explicit | Need, access, urgency, economics and strategic fit |
| **Customer journey** | Progression reflects customer decisions | Roles, questions, evidence, barriers and channels |
| **Message and offer** | Claims connect differentiated value to need | Outcomes, proof, relevance, accessibility and trust |
| **Demand portfolio** | Programs balance capture and creation | Channels, accounts, content, partners, experiments and cost |
| **Handoff** | Acceptance and follow-through are governed | Definitions, evidence, timing, ownership and feedback |
| **Measurement** | Performance connects to commercial outcomes | Progression, pipeline, revenue, economics and confidence |
| **Technology and data** | Systems support one customer view | Consent, source, identity, integration, quality and access |
| **Governance** | Investment changes through evidence | Cadence, decisions, owners, experiments and reallocation |

## ROALLA Interpretation

Dependencies should be evaluated as a connected system. A weakness in ownership, data, architecture, delivery or governance can change the economics and risk of an otherwise attractive initiative.

SECTION 02

# Detailed Readiness Assessment

## Convert executive intent into verifiable requirements, accountable evidence and clear remediation actions.

READINESS CHECKLIST

# Market Message and Demand Readiness

**Completion standard** Mark Ready only when the supporting evidence has been verified. Assign an evidence owner to every open item.

| Gate | Readiness requirement | Ready | Gap | Evidence owner |
|---|---|---|---|---|
| A01 | Priority segments and buying situations are selected using need, access, economics and strategic fit. | ☐ | ☐ | _____ |
| A02 | Ideal customer criteria include fit, propensity, potential value, service complexity and retention potential. | ☐ | ☐ | _____ |
| A03 | The journey maps customer questions, roles, evidence and barriers rather than internal funnel labels alone. | ☐ | ☐ | _____ |
| A04 | Positioning connects differentiated capability to a specific customer outcome and credible reason to act. | ☐ | ☐ | _____ |
| A05 | Performance and value claims are supported, approved and appropriate to the intended audience. | ☐ | ☐ | _____ |
| A06 | Content supports real customer decisions across discovery, validation, consensus, purchase and adoption. | ☐ | ☐ | _____ |
| A07 | The demand portfolio balances existing demand, new demand, priority accounts, partners and customer advocacy. | ☐ | ☐ | _____ |
| A08 | Channel choices reflect customer behaviour, reach, cost, conversion, brand and compliance requirements. | ☐ | ☐ | _____ |
| A09 | Campaigns define a decision hypothesis, target audience, expected progression and learning threshold. | ☐ | ☐ | _____ |
| A10 | Marketing experiences are clear, accessible, consistent and aligned to the actual product and service promise. | ☐ | ☐ | _____ |

READINESS CHECKLIST CONTINUED

# Handoff Measurement and Governance Readiness

**Completion standard** Use Gap to create a dated remediation action and identify the management decision that cannot proceed.

| Gate | Readiness requirement | Ready | Gap | Evidence owner |
|---|---|---|---|---|
| B01 | Lead and account acceptance criteria specify evidence, exclusions, routing, response time and accountable owner. | ☐ | ☐ | _____ |
| B02 | Marketing and sales service levels include follow-through, rejection reasons, recycle logic and feedback quality. | ☐ | ☐ | _____ |
| B03 | Source and campaign data are governed from first interaction through opportunity, customer and expansion. | ☐ | ☐ | _____ |
| B04 | Attribution is presented with assumptions and used alongside cohort, progression and qualitative evidence. | ☐ | ☐ | _____ |
| B05 | Reporting distinguishes engagement, accepted demand, pipeline, revenue, acquisition cost and retention influence. | ☐ | ☐ | _____ |
| B06 | Consent, identification, unsubscribe, privacy, retention and third-party outreach practices are controlled. | ☐ | ☐ | _____ |
| B07 | CRM, marketing, web, product and finance systems use shared identities, definitions and systems of record. | ☐ | ☐ | _____ |
| B08 | Budget is reallocated using evidence, strategic priority, capacity and expected customer or revenue impact. | ☐ | ☐ | _____ |
| B09 | Weekly and monthly reviews produce decisions, owners and dated actions rather than activity narration. | ☐ | ☐ | _____ |
| B10 | Experiments document hypotheses, audiences, treatments, measures, thresholds and learning for reuse. | ☐ | ☐ | _____ |

WEIGHTED EXECUTIVE ASSESSMENT

# Readiness Scorecard

| Dimension | Weight | Evidence standard | Score | Status |
|---|---|---|---|---|
| **Strategy and segments** | 20% | Market priorities, ideal customers, buying situations and investment choices | __/20 | Strong / Developing / Gap |
| **Customer and message** | 20% | Journey, roles, questions, content, proof, accessibility and trust | __/20 | Strong / Developing / Gap |
| **Demand and channels** | 15% | Capture, creation, accounts, partners, events, digital and experiments | __/15 | Strong / Developing / Gap |
| **Funnel and handoffs** | 15% | Progression, acceptance, response, qualification, feedback and ownership | __/15 | Strong / Developing / Gap |
| **Data and attribution** | 15% | Consent, identity, source, quality, influence, pipeline and economics | __/15 | Strong / Developing / Gap |
| **Governance and learning** | 15% | Cadence, decisions, budget shifts, experiments and accountability | __/15 | Strong / Developing / Gap |
| **TOTAL** | 100% | Weighted executive assessment | __/100 | Pursue / Prepare / Monitor |

## Decision Thresholds

| Score | Posture | Management decision |
|---|---|---|
| **75 to 100** | **PURSUE** | Proceed to bounded execution subject to no hard-gate failure. |
| **50 to 74** | **PREPARE** | Complete a focused readiness plan before major commitment. |
| **0 to 49** | **MONITOR** | Resolve foundational gaps before investing further. |

A single material hard-gate failure overrides the weighted score. ROALLA also applies judgment where administrative readiness is high but strategic value, adoption or commercial viability is weak.

SECTION 03

# Execution and Advisory Roadmap

## Align market choices and customer progression first, then reset handoffs, data and investment governance around measurable outcomes.

# Recommended 90 Day Mobilization

| Timing | Focus | Key activities | Management output |
|---|---|---|---|
| **Days 1 to 15** | Align | Confirm growth priorities, segments, decisions, definitions, owners and evidence request. | Approved alignment mandate |
| **Days 16 to 35** | Diagnose | Assess journey, message, programs, handoffs, data, systems, economics and cadence. | Alignment fact base |
| **Days 36 to 55** | Design | Define target journey, acceptance, measurement, data, operating roles and governance. | Marketing-revenue blueprint |
| **Days 56 to 75** | Validate | Test target accounts, messages, workflows, reporting and compliance controls. | Validated operating recommendation |
| **Days 76 to 90** | Mobilize | Launch priority changes, budget decisions, dashboards, owners and learning cadence. | Executive action plan |

## Twelve to Twenty Four Month Path

- Quarter 1: align segments, journey, messaging, acceptance and essential commercial definitions.
- Quarter 2: implement trusted source, progression, pipeline and customer outcome reporting.
- Quarters 3 and 4: optimize channel portfolio, account orchestration, content and investment reallocation.
- Year 2: scale automation and predictive insight only where consent, data quality and decision usefulness remain strong.

ROALLA ADVISORY MODEL

# How ROALLA Can Help

ROALLA acts as the technology and commercialization advisor connecting market strategy, customer experience, marketing, sales, data architecture, platforms and executive governance. The objective is an integrated revenue system that improves commercial learning and investment quality—not simply a larger campaign calendar.

| ROALLA workstream | Executive value |
|---|---|
| **Alignment diagnostic** | Establish the fact base across strategy, journey, demand, handoffs, data, systems and economics. |
| **Market and customer focus** | Align priority segments, ideal customers, buying situations, outcomes and exclusions. |
| **Journey and message architecture** | Design customer progression, content, proof, claims and channel experience. |
| **Demand portfolio** | Balance capture, creation, accounts, partners, advocacy, experiments and investment. |
| **Funnel and handoff governance** | Define acceptance, routing, response, qualification, feedback and recycle logic. |
| **Data and technology** | Align identity, consent, source, CRM, marketing platforms, integration and reporting. |
| **Measurement and economics** | Connect activity to progression, pipeline, revenue, cost and customer outcomes. |
| **Ongoing growth assurance** | Monitor evidence, decisions, risks, experiments and value realization. |

## Recommended Initial Mandate

- Four-week marketing-to-revenue alignment diagnostic.
- Verified market, journey, demand, handoff, data and economics fact base.
- Target operating model with shared definitions, technology and measurement architecture.
- Executive readout and 90-day alignment plan with owners and decision measures.

CONTROL FRAMEWORK

# Key Risks and Controls

| Risk | Exposure | ROALLA control |
|---|---|---|
| **Activity bias** | Volume metrics substitute for customer progression. | Connect every measure to a decision, stage change or commercial outcome. |
| **Quantity over quality** | Demand targets reward poor-fit records. | Use fit, intent, acceptance, conversion, economics and retention evidence. |
| **Attribution theatre** | Models imply precision the data cannot support. | Disclose assumptions and triangulate source, cohort and qualitative evidence. |
| **Handoff loss** | Context disappears between marketing and sales. | Govern acceptance, routing, response, rejection, recycle and feedback. |
| **Message drift** | Channels create inconsistent promises. | Use approved value, proof and claim governance across touchpoints. |
| **Channel concentration** | Performance depends on one unstable source. | Manage a portfolio and test concentration, incrementality and resilience. |
| **Consent exposure** | Outreach or data reuse exceeds authority. | Apply CASL and privacy controls with records, training and vendor oversight. |
| **Technology fragmentation** | Disconnected tools obscure identity and outcomes. | Simplify architecture around the journey, decisions and systems of record. |

## Professional Advice

Qualified legal, privacy, security, tax, accounting, employment and regulatory advisors should validate matters within their professional scope. ROALLA coordinates those inputs with technology strategy, architecture, commercialization, governance and transformation decisions.

OFFICIAL EVIDENCE BASE

# Selected Official Sources

These sources support the management principles summarized in this guide. Standards, laws, guidance and organizational obligations continue to evolve and must be confirmed for the specific context before acting.

**CRTC Canada anti spam legislation.** Official source — Official requirements for consent, identification and unsubscribe mechanisms in commercial electronic messages.

**CRTC compliance with spam and telemarketing rules.** Official source — Official compliance guidance covering records, consent, training, third parties and telemarketing.

**Office of the Privacy Commissioner of Canada privacy for businesses.** Official source — Current guidance for private sector privacy programs and responsible customer information practices.

**Competition Bureau Canada deceptive marketing practices.** Official source — Official guidance on misleading representations and the general impression created by marketing.

**Competition Bureau Canada performance claims.** Official source — Official guidance requiring product and service performance claims to be supported by adequate and proper testing before use.

**Trade Commissioner Service target market research.** Official source — Official guidance for screening, assessing and selecting target markets.

**Government of Canada Digital Standards.** Official source — User-centred, secure, accessible and iterative digital-service principles.

## Advisory Disclaimer

This ROALLA guide is a strategic readiness and marketing document. It is not a certification, audit opinion, legal opinion, privacy opinion, security assurance, investment recommendation or guarantee of results. Management must validate current obligations, company facts and professional advice before making material decisions.
